**Referent: Tom Boháček**

## Joomla Templates entwickeln Übersicht

- Fragen die man sich stellen sollte (10 Min.)
- Entwurf (5 Min.)
- fertiges Screendesign (5 Min.)
- Umsetzung in ein statisches Template (10 Min.)
- Das Joomla Template (30 Min.)
- Das Stylesheet (30 Min.)
- Templating (60 Min.)
- Extrawünsche (40 Min.)
- Joomla 1.5 Templates
- Abschließende Worte

# Joomla Templates entwickeln

## Das Template

The screenshot shows a Joomla! website template with a blue header and a white main content area. The Joomla! logo is prominently displayed at the top left, with the tagline "...because open source matters". A navigation bar contains links for Home, Kontakt, News, and Links. A search box is located in the top right corner. The main content area is divided into several sections: a Main Menu with links like Home, Joomla! Lizenz, News, Blog, Links, Kontakt, Suchen, News Feeds, FAQs, Wrapper, 1.1 Development Cycle, Section Blog, and Sections; a Latest News section with a list of news items; a Popular section with a list of popular news items; a central article titled "Willkommen bei Joomla!" written by Web Master on Saturday, 12 June 2004, featuring a warning about Joomla! 1.1.0 Alpha2; a Powered by Joomla! version 1.1 logo; a Login Form; and a Who's Online section. The right sidebar contains a Polls section titled "Diese Joomla! Installation war ...." with radio button options and a "Vote" button, and a "Who's Online" section.

## Content Typen

### Artikel

The screenshot shows the Joomla! 1.1.0 Alpha2 website interface. At the top left is the Joomla! logo with the tagline "...because open source matters". To the right is a "Newsflash" section with a warning message: "Hier könnte Info Text zu internationalen Translationsteams stehen ... Folgetext dann weg. Yesterday all servers in the U.S. went out on strike in a bid to get more RAM and better CPUs. A spokes person said that the need for better RAM was due to some fool increasing the front-side bus speed. In future, busses will be told to slow down in residential motherboards." Below this is a navigation menu with "Home", "Kontakt", "News", and "Links". A search bar is located on the right side of the header.

The main content area features a "Main Menu" on the left with items like Home, Joomla! Lizenz, News, Blog, Links, Kontakt, Suchen, News Feeds, FAQs, Wrapper, 1.1 Development Cycle, Section Blog, and Sections. The main article is titled "Willkommen bei Joomla!" and is written by "Web Master" on "Saturday, 12 June 2004". The article contains a red warning: "\*\* Joomla! 1.1.0 Alpha2 should NOT to be used for a 'live' or 'production' site \*\*". The text discusses the challenges of CMS development, stating that Joomla! is not as simple as it seems and is still under development. A "Powered by Joomla! version 1.1" logo is displayed, along with the Joomla! logo itself.

**Joomla! Eigenschaften:**

- Komplett datenbankgesteuerte Website Engine
- Neuigkeiten-, Produkt- und/oder Dienstleistungsbereiche sind leicht zu bearbeiten und administrierbar
- Themenbereiche können durch Autoren bearbeitet werden
- Voll anpassbares Layout inklusive linker, zentrierter und rechter Menüboxen
- Browserupload von Bildern in die eigene Bibliothek für die Nutzung auf der gesamten Webseite
- Dynamisches Forum/Umfraeger/Wahlkabinen für on-the-spot Ergebnisse
- Läuft auf Linux, FreeBSD, MacOSX Server, Solaris und AIX

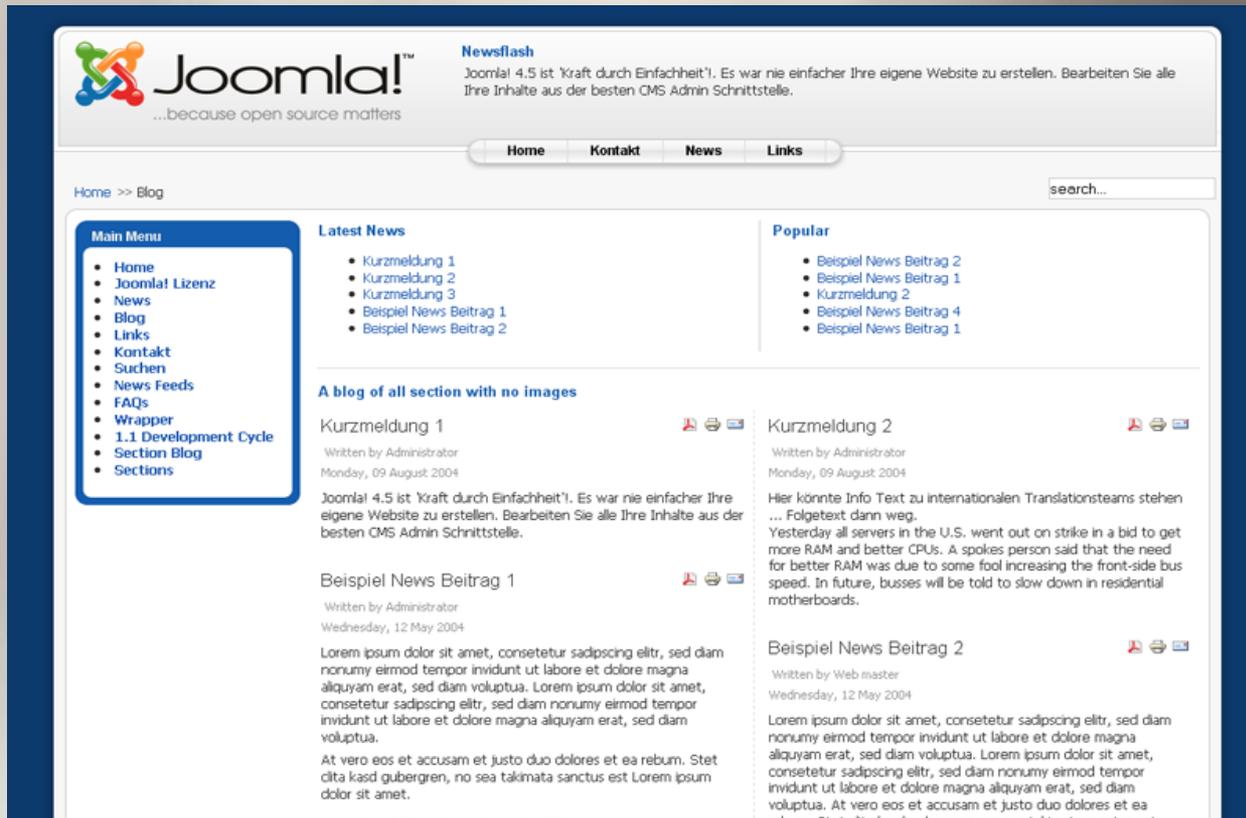

**Umfangreiche Administration:**

- Reihenfolge von Objekten ändern inklusive News, FAQs, Artikel etc.
- Zufallsgesteuerter Generator für Kurzmeldungen
- Remote Autoren Eingabe Modul für News, Artikel, FAQs und Weblinks

### Blog

The screenshot shows a Joomla! website interface. At the top left is the Joomla! logo with the tagline "...because open source matters". To the right is a "Newsflash" section with a message about Joomla! 4.5. Below the logo is a navigation menu with "Home", "Kontakt", "News", and "Links". A search bar is located on the right side. The main content area is divided into three columns. The left column contains a "Main Menu" with links to Home, Joomla! Lizenz, News, Blog, Links, Kontakt, Suchen, News Feeds, FAQs, Wrapper, 1.1 Development Cycle, Section Blog, and Sections. The middle column is titled "Latest News" and lists several news items, including "Kurzmeldung 1", "Kurzmeldung 2", "Kurzmeldung 3", "Beispiel News Beitrag 1", and "Beispiel News Beitrag 2". Below this is a section titled "A blog of all section with no images" containing three news items: "Kurzmeldung 1" (Monday, 09 August 2004), "Beispiel News Beitrag 1" (Wednesday, 12 May 2004), and "Beispiel News Beitrag 2" (Wednesday, 12 May 2004). The right column is titled "Popular" and lists "Beispiel News Beitrag 2", "Beispiel News Beitrag 1", "Kurzmeldung 2", "Beispiel News Beitrag 4", and "Beispiel News Beitrag 1". Each news item includes a title, author, date, and a short text snippet.

## Content Typen

### Komponente

The screenshot shows the Joomla! 4.5 contact page. At the top left is the Joomla! logo with the tagline "...because open source matters". To the right is a "Newsflash" section with the text: "Joomla! 4.5 ist 'Kraft durch Einfachheit'. Es war nie einfacher Ihre eigene Website zu erstellen. Bearbeiten Sie alle Ihre Inhalte aus der besten CMS Admin Schnittstelle." Below this is a navigation menu with "Home", "Kontakt" (highlighted), "News", and "Links". A breadcrumb trail reads "Home >> Contact >> Kontakte >> Name" and a search box is on the right. The main content area is divided into two columns. The left column contains a "Main Menu" with links: Home, Joomla! Lizenz, News, Blog, Links, Kontakt, Suchen, News Feeds, FAQs, Wrapper, 1.1 Development Cycle, Section Blog, and Sections. The right column is titled "Kontakt" and includes a "Name" section with fields for Strasse, Bezirk, Staat, Land, and PLZ. Below this are fields for "Telefon" and "Fax", and a "Weitere Infos" link. A "Send an Email to this Contact:" section contains input fields for "Enter your name:", "Email address:", and "Message subject:". At the bottom is a large text area for "Enter your message:". A "Powered by Joomla! version 1.1" logo is in the bottom right corner.

## Das fertige Screendesign

The screenshot displays a Joomla! website template titled "World Knowledge" with the tagline "Information is not knowledge." The page layout includes a search bar at the top left, a navigation menu with categories like "PRESENT" and "FUTURE", and a main content area. The article shown is "About Information Loss", featuring a headline, a short paragraph of Lorem Ipsum text, and a "Relevant" section with links to "Error Models", "Asymmetric Information Problems", and "Drainage Information". The page also includes a breadcrumb trail, language selection options, and footer links for "Back", "Print", and "E-Mail".

## Das Zen Garden Prinzip

### CSS Zen Garden

The Beauty of CSS Design

A demonstration of what can be accomplished visually through CSS-based design. Select any style sheet from the list to load it into this page.

Download the sample [html file](#) and [css file](#).

#### The Road to Enlightenment

Littering a dark and dreary road lay the past relics of browser-specific tags, incompatible DOMs, and broken CSS support.

Today, we must clear the mind of past practices. Web enlightenment has been achieved thanks to the tireless efforts of folk like the [W3C](#), [WaSP](#) and the major browser creators.

The css Zen Garden invites you to relax and meditate on the important lessons of the masters. Begin to see with clarity. Learn to use the (yet to be) time-honored techniques in new and invigorating fashion. Become one with the web.

#### So What is This About?

There is clearly a need for [CSS](#) to be taken seriously by graphic artists. The Zen Garden aims to excite, inspire, and encourage participation. To begin, view some of the existing designs in the list. Clicking on any one will load the style sheet into this very page. The code remains the same, the only thing that has changed is the external .css file. Yes, really.

[CSS](#) allows complete and total control over the style of a hypertext document. The only way this can be illustrated in a way that gets people excited is by demonstrating what it can truly be, once the reins are placed in the hands of those able to create beauty from structure. To date, most examples of neat tricks and hacks have been demonstrated by structurists and coders. Designers have yet to make their mark. This needs to

## Das Zen Garden Prinzip

css zen garden  
the beauty of css design

A demonstration of what can be accomplished  
**VISUALLY CSS**  
through **-based design**

Select any style sheet from the list to load it into this page.

**The road to enlightenment**

Wir blicken zurück auf den dunklen Weg vergangener Relikte wie browserspezifischen Tags, inkompatiblen *DOMs* und einer brüchigen *CSS* Unterstützung.

Heute müssen wir den Kopf von den alten Praktiken befreien. Die Erleuchtung im Web wurde nicht zuletzt dank der unermüdlichen Anstrengungen von Leuten wie dem *W3C*, *WASP* sowie den großen Browserherstellern erreicht.

Der css Zen Garden lädt Sie ein zu entspannen und über die wesentlichen Lektionen der Meister zu meditieren. Beginnen Sie klar zu sehen. Lernen Sie die (letzten Endes) Zeit gewinnenden Techniken in einer neuen und anregenden Weise anzuwenden. Werden Sie Eins mit dem Web.

**so what is this about?**

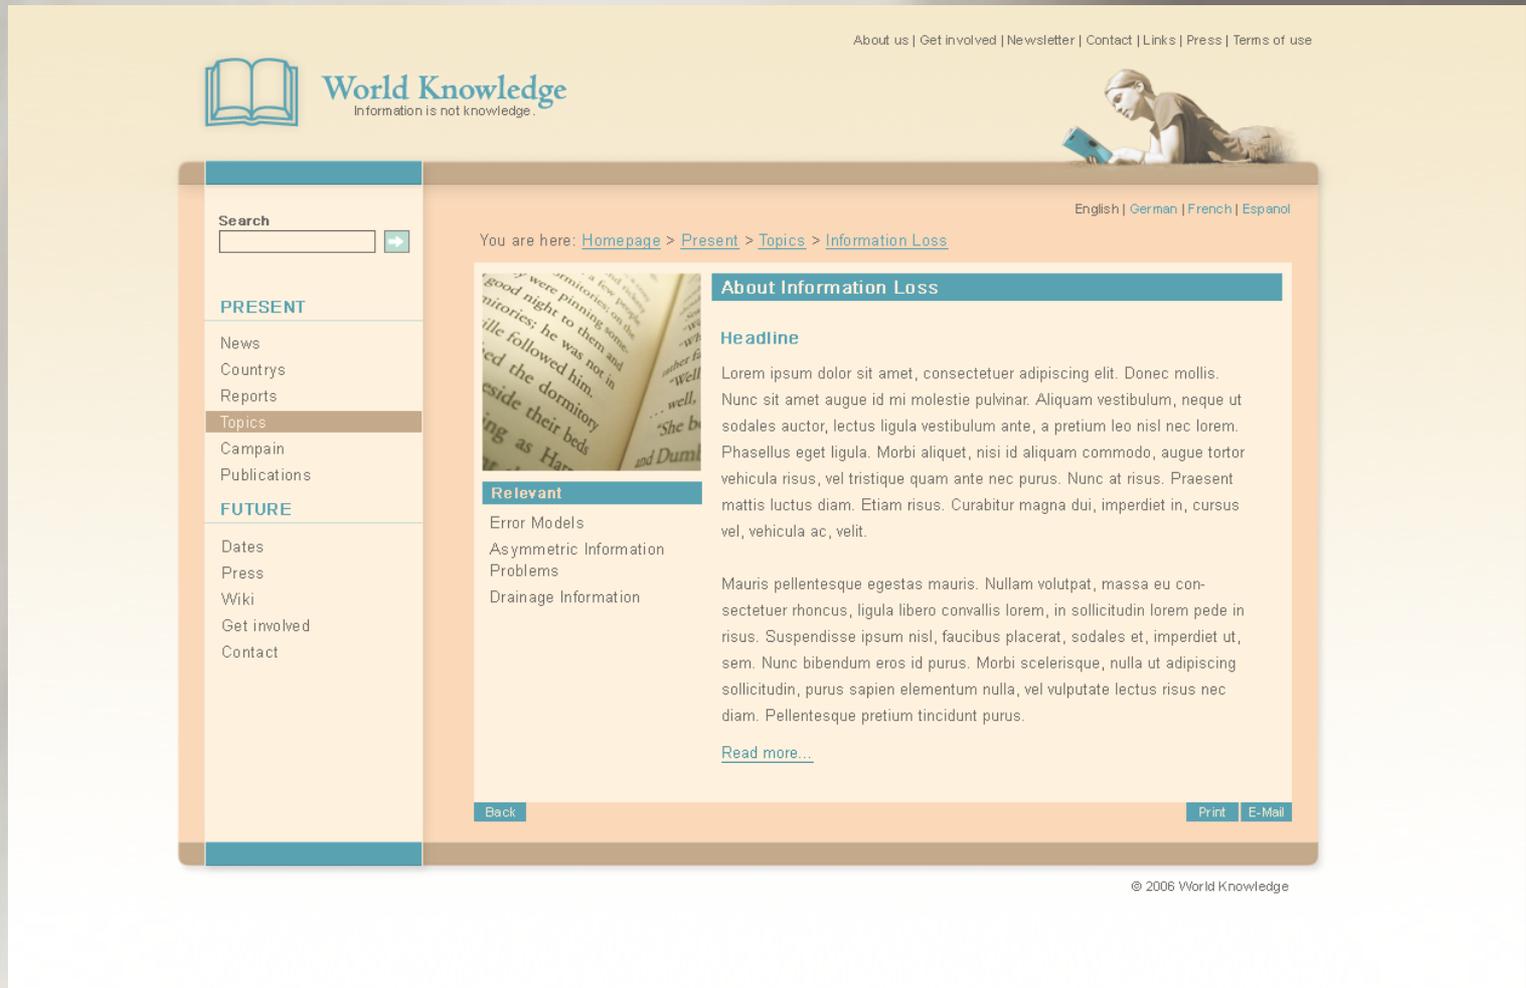

Es ist klar erforderlich, dass *CSS* von Grafikünstlern erst genommen wird. Der Zen Garden strebt danach zu begeistern, zu inspirieren und zur Teilnahme zu ermutigen. Betrachten Sie sich zunächst einige der existierenden Designs aus der Liste. Wenn Sie eines davon anklicken wird es in diese Seite geladen. Der Code

# Joomla Templates entwickeln

## Das statische Template

The screenshot shows a Joomla! static template for 'World Knowledge'. The page has a light yellow background. At the top right, there is a 'top navi' link. The main header features the 'World Knowledge' logo (an open book icon) and the tagline 'Information is not Knowledge.' To the right of the header is an image of a person reading a book. The main content area is divided into a left sidebar and a main content column. The sidebar contains a search box, a 'MAIN MENU' section, and a 'Link' section. The main content column has a 'Home' section, a 'Newsflash' section, two text blocks ('Text 1' and 'Text 2'), and an 'In Menu Punkt' section. The 'In Menu Punkt' section includes an image of a coffee cup and a paragraph of Lorem Ipsum text. At the bottom right of the page, there is a copyright notice: '© 2006 World Knowledge'.

🖼️ template_thumbnail	png	32.349
📄 templateDetails	xml	1.438

## Joomla Templates entwickeln

### Wie sieht ein Joomla Template aus?

#### Step 1 - Das (fast) kleinste Template der Welt

```
<?php defined( '_VALID_MOS' ) or die( 'Direct Access to this location is not allowed.' ); ?>  
<?php echo '<?xml version="1.0" encoding="utf-8"? .>'; ?>  
<!DOCTYPE html PUBLIC "-//W3C//DTD XHTML 1.0 Transitional//EN"  
"http://www.w3.org/TR/xhtml1/DTD/xhtml1-transitional.dtd">  
<html xmlns="http://www.w3.org/1999/xhtml">
```

Kein Direktaufruf ermöglichen

```
<head>  
<?php mosShowHead(); ?>
```

META-Tags u.a.  
Informationen  
ausgeben

```
<?php  
if ( $my->id ) {  
    If ( $_REQUEST["task"] == "edit" || $_REQUEST["task"] == "new" ) {  
        Include ( "editor/editor.php" );  
        initEditor();  
    }  
}  
?>
```

Editor aufrufen  
wenn nötig

```
<link href="<?php echo $mosConfig_live_site;?>/templates/ngo/css/template.css" rel="stylesheet"  
type="text/css" />  
</head>  
<body>  
    <?php mosMainBody(); ?>  
</body>  
</html>
```

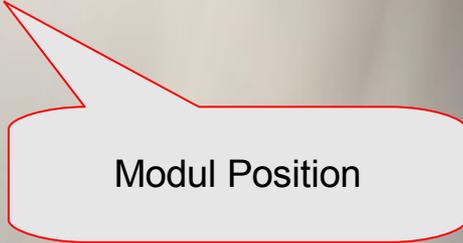

Ausgabe des  
Joomla Content

## Joomla Templates entwickeln

### Wohin mit den Modulen?

### Step 2 - Das erste Modul

```
<body>  
  <?php mosLoadModules ( 'user3'); ?>  
  <?php mosMainBody(); ?>  
</body>
```

Modul Position

## Joomla Templates entwickeln

### Modulparameter

## Die vier Ausgabearten von Modulen

Standard Tabellen Ausgabe:  
`mosLoadModules ( 'user3');`

```
<table class="moduletable">
  <tr><th valign="top">Modulüberschrift </th>
  <td>Content</td>
</table>
```

Nacktes Modul:  
`mosLoadModules ( 'user3',-1);`

Content

DIV-BOX und H3 Headline:  
`mosLoadModules ( 'user3',-2);`

```
<div class="moduletable">
  <h3>Überschrift</h3>
  Content
</div>
```

Wrapper DIVs:  
`mosLoadModules ( 'user3',-3);`

```
<div class="module">
  <div>
    <div>
      <div>
        <h3>
          ...
```

## Joomla Templates entwickeln

### Wohin mit den Modulen?

#### Das erste Modul

```
<body>
  <?php
    if (mosCountModules( "user3" )) {
      mosLoadModules ( 'user3',-2);
    }
  ?>
  <?php mosMainBody(); ?>
</body>
```

Modul nur laden  
wenn nötig

Modul-Content mit  
DIV umgeben und  
Modultitel als H3

## Backend: Modulparameter

The screenshot shows the Joomla! Administrator interface for editing a module. The page title is "Site Module: Edit [ Top Menu ]". The interface is divided into several sections:

- Details:** Contains fields for Title (Top Menu), Show title (No), Position (user3), Module Order (1:: Top Menu), Access Level (Public), Published (Yes), ID (17), and Description (Displays a menu).
- Parameters:** Contains fields for Menu Class Suffix (-nav), Module Class Suffix, Menu Name (topmenu), Menu Style (Flat List), Full Active highlighting (No), Enable Cache (No), Show Menu Icons (No), and Menu Icon Alignment (Left).
- Pages / Items:** A list of menu items with a search bar and a list of items including "All", "None", and various menu items like "Joomla! Home", "Joomla! Forums", "OSM Home", "Administrator", "Your Details", etc.

Three red speech bubbles are overlaid on the screenshot, pointing to specific areas:

- Moduldetails:** Points to the "Details" section.
- Modul CSS-Klassen:** Points to the "Menu Class Suffix" and "Module Class Suffix" fields.
- Modul Ausgabestil:** Points to the "Menu Style" field.

### **Übersicht eines Joomla Stylesheets**

### **Praktischer Teil**

## Joomla Templates entwickeln

### Templating

#### **Step 4 - Integration statisches Template**

Auf Grundlage des statischen Templates wird die index.php des NGO-Templates erstellt.

Des weiteren wird die Top-Navigaton eingebunden.

#### **Praktischer Teil**

## Joomla Templates entwickeln

### Templating

#### Step 5 - Integration aller Module

- Hauptnavigation 1
- Hauptnavigation 2
- Breadcrumb
- Suche
- Newsflash
- Latest News & Popular
- Kontext Navigation
- Footer

#### Praktischer Teil

## Joomla Templates entwickeln

### Templating

### Problematik Hardcoded Joomla Markup

An manchem Markup kommt man nicht vorbei...

Ausgabe des mosMainBody() :

```
<table class="contentpaneopen">
  <tbody>
    <tr>
      <td class="contentheading" width="100%">
        Newsflash 2
      </td>
      <td class="buttonheading" align="right" width="100%">
        <a href="...">
```

## Joomla Templates entwickeln

### Templating

### Problematik Hardcoded Joomla HTML

Sogenannte "Corehacks" wenn möglich vermeiden.

Wenn trotzdem nötig, vorgenommene Änderungen nachvollziehbar dokumentieren.

```
<!--  
###_hack_start  
<table class="contentpaneopen">  
  <tbody>  
    <tr>  
      <td class="contentheading" width="100%">Newsflash 2</td>  
      <td class="buttonheading" align="right" width="100%">  
        <a href="...  
  
-->  
  
<div class="contentpaneopen">  
  <div class="contentheading">Newsflash 2</div>  
  <div class="buttonheading"><a href="...  
  
<!-- ###_hack_end -->
```

## Joomla Templates entwickeln

### Extrawünsche

### Step 6 – ein- und zweispaltiges Layout

Spalte nur darstellen wenn Modul-Content vorhanden

```
<?php
if ( mosCountModules( 'user1' ) || mosCountModules( 'user2' ) ) {
?>
  <table class="contents" border=0>
    <tr valign="top">
      <?php
        if ( mosCountModules( 'user1' ) ) {
?>
          <td><?php mosLoadModules ( 'user1', -2); ?></td>
        <?php } ?>
      <?php
        if ( mosCountModules( 'user2' ) ) {
?>
          <td><?php mosLoadModules ( 'user2', -2); ?></td>
        <?php } ?>
      </tr>
    </table>
  <div id="maindivider"></div>
<?php } ?>
```

## Joomla Templates entwickeln

### Extrawünsche

### Step 6 – ein- und zweispaltiges Layout

Beispiel aus dem MadeYourWeb Template

```
// 50%-layout für beide Module
if ((mosCountModules( 'user1' )) && (mosCountModules( 'user2' ))) {
    $usera = 'user1';
    $userb = 'user2';
}
// 100%-layout für eines der beiden Module
else if ((mosCountModules( 'user1' )) || (mosCountModules( 'user2' ))) {
    $usera = 'user3';
    $userb = 'user3';
}
?>

if (mosCountModules( "user1" )) {
?>
    <div id="<?php echo $usera; ?>">
        <?php mosLoadModules ( 'user1',-2); ?>
    </div>
<?php } ?>
```

## Joomla Templates entwickeln

### Extrawünsche

### Step 7 – Header-Wechsel

CSS-basiert & nicht destruktiv

Modifikation index.php

```
<?php
    $title = $GLOBALS['mainframe']->_head['title'];
    $pos = strpos($title, "-") + 2;
    $len = strlen($title);
    $header = strtoupper(str_replace(" ", "_", substr($title, $pos-$len)));
?>

<body id="<?=$header ?>">
```

## Joomla Templates entwickeln

### Extrawünsche

## Step 7 – Header-Wechsel

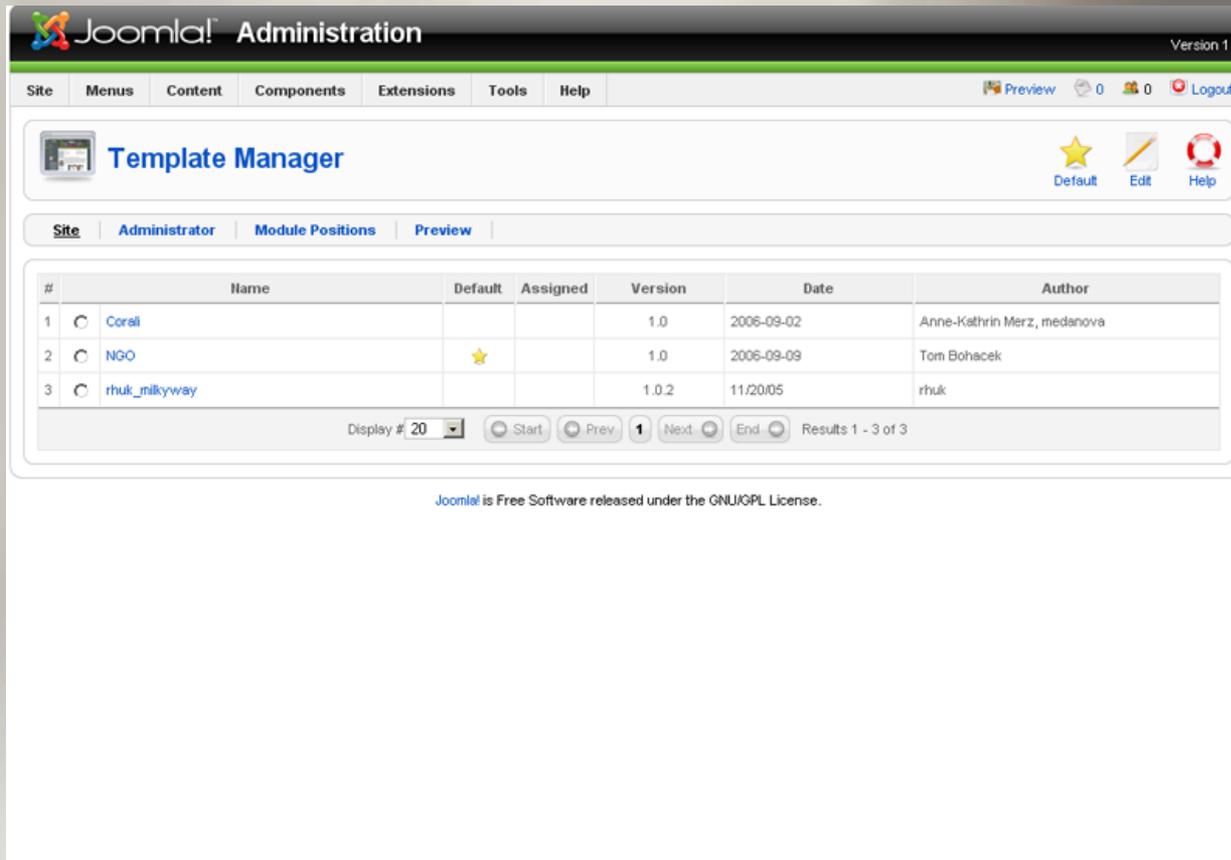

### CSS-Klassen

```
div#header {  
    background: #f5eace url(..images/header_bgr.gif) 0 0 repeat-x;  
}  
div#header_r {  
    border: 0px solid #000;  
    height: 135px;  
    background: url(..images/header_home.jpg) right 0px no-repeat;  
}  
#BLOG div#header_r {  
    border: 0px solid #000;  
    height: 135px;  
    background: url(..images/header_BLOG.jpg) right 0px no-repeat;  
}  
#SEARCH div#header_r {  
    border: 0px solid #000;  
    height: 135px;  
    background: url(..images/header_SEARCH.jpg) right 0px no-repeat;  
}
```

## Joomla 1.5 Templates

### Joomla 1.5 Templates auf patTemplate Basis

The screenshot shows the Joomla! Administration interface for the Template Manager. The top navigation bar includes 'Site', 'Menus', 'Content', 'Components', 'Extensions', 'Tools', and 'Help'. The main content area is titled 'Template Manager' and features a table of installed templates. The table has columns for '#', 'Name', 'Default', 'Assigned', 'Version', 'Date', and 'Author'. Three templates are listed: 'Coreli', 'NGO', and 'rhuk\_milkyway'. The 'NGO' template is marked as the default with a yellow star icon. Below the table, there are pagination controls showing 'Display # 20' and 'Results 1 - 3 of 3'. At the bottom, a small text line reads 'Joomla! is Free Software released under the GNU/GPL License.'

#	Name	Default	Assigned	Version	Date	Author
1	Coreli			1.0	2006-09-02	Anne-Kathrin Merz, medanova
2	NGO	★		1.0	2006-09-09	Tom Bohacek
3	rhuk_milkyway			1.0.2	11/20/05	rhuk

## Joomla Templates entwickeln

### Joomla 1.5 Templates

#### **JDocument API**

- JDocument basiert auf patTemplate
- patTemplate ermöglicht die Trennung von Geschäftslogik, Layout und Content.
- patTemplate basiert auf einem XML-Derivat.
- Funktionen wie mosLoadModules und mosMainBody werden durch patTemplate Elemente ersetzt.
- Abwärtskompatibilität zu Joomla 1.x Templates gewährleistet.

Zwei Beispiele...

## Joomla Templates entwickeln

### Joomla 1.5 Templates

#### JDocument API

Joomla 1.x

```
mosLoadModules ( 'user4', -1);
```

Joomla 1.5

```
<jdoc:include type="modules" name="user4" style="-1" />
```

Joomla 1.x

```
if ( mosCountModules( 'user1' )  
    // Code  
}
```

Joomla 1.5

```
<jdoc :exists type="modules" condition="user1" >  
    // Code  
</jdoc>
```

## **Joomla Templates entwickeln**

### Abschließende Worte

### **Erfahrungswerte beim Templating**

- Basislayout entwickeln und abwandeln
- Mit den Joomla CSS-Klassen vertraut machen
- Hacks vermeiden
- Beim Screendesign Fähigkeiten und Einschränkungen des CMS beachten, aber...
- ...niemals den kreativen Prozess einschränken!
